About the Author 24

What's this weird
but cute animal?

Bright
white
skin!

It's a
**beluga
whale.**

BIG,
round forehead!

Brrrr!

Beluga whales live
in the cold Arctic
Ocean.

They swim in
groups called **pods**.

A pod can have up
to 200 whales!

A group of white belugas are swimming in deep blue water. The whales are of various sizes and are scattered across the frame, with some showing their heads and backs above the surface. The water has a textured, wavy appearance.

a pod of belugas

Often, ice covers
parts of the
Arctic Ocean.
