# Meet the pups

Five arctic fox **pups** peek out from some rocks.

The pups are about five weeks old.

They live in a cozy underground home.

They live with their mother and father.

**Underground  
home**

**Arctic fox pups**

# Where do arctic foxes live?

Arctic foxes live near the **North Pole**.

This part of the world is called the **Arctic**.

That is how the foxes got their name.

The Arctic is one of the coldest places on Earth.

# Arctic Fox Pups

Arctic fox pups grow up in one of the coldest places on Earth. When they are very small, their parents bring food to them. As they grow, however, their parents teach them how to hunt and find their own food. Look inside to discover all the ways these wild baby animals get ready to become grown-up arctic foxes.
