Animals That Swim

What can swim?

A fish can swim.

What can swim?

A seal can swim.

A large blue whale is breaching the ocean surface. The whale's back and a portion of its tail are visible above the water, creating a massive splash. The water is a deep blue, and the sky is a lighter blue. The whale's skin appears dark and textured. The splash is a mix of white and blue water.

What can swim?

A bear can swim.
