# Teaching Tips

## Before Reading

- Briefly discuss animal life cycles. Babies are born, they grow, and they have their own babies.
- Look through the glossary together. Read and discuss the words.
- Go on a picture walk, looking through the pictures to discuss vocabulary and make predictions about the text.

## During Reading

- Encourage readers to point to each word as it is read. Stop occasionally to ask readers to point to a specific word in the text.
- If a reader encounters an unknown word, ask them to look at the rest of the page. Are there any clues to help them understand?

## After Reading

- Check for understanding.
  - ▶ What are some things baby dogs do during the first few weeks? What about after that?
  - ▶ When does a puppy start eating solid food?
  - ▶ Look at page 22. What did you learn about baby dogs from reading this book?
- Ask the readers to think deeper.
  - ▶ Other than size, what is one thing that is different about baby dogs and adult dogs?
  - ▶ What is one thing that is similar about baby and adult dogs?

# It's a Baby Dog!

Lick!

The mother dog licks her **newborn** baby.

The puppy starts to **breathe**.

Soon, the mother has more puppies.

This group of baby dogs is called a **litter**.

The puppies are very small.

The babies can fit in a person's hand!
